## MSDS PRODUCT INFORMATION

Date: 10/07/2005  
To: MSDS Requester  
From: 3E Company  
Subject: The MSDS you have requested

☐ MSDS NOT REQUIRED

In response to your request for a Material Safety Data Sheet, according to the OSHA Hazard Communication Standard (Right-to-Know), the following item is an article. Articles are defined in 29 CFR 1910.1200(c). Products such as Drugs, cosmetics, food, or alcoholic beverages, wood or wood products, and tobacco or tobacco products, as defined in 29 CFR 1910.1200(b)(6), are exempt from the Hazard Communication Standard. Items that are considered articles, as defined in 29 CFR 1910.1200(c), are also exempt from this Standard. Therefore, the manufacturer is not required to provide an MSDS for this product.

☒ MSDS DISCONTINUED PRODUCT

In response to your request for a Material Safety Data Sheet, the manufacturer has discontinued the product listed below. The MSDS Attached is the most current version, or an MSDS is no longer available.

☐ MSDS BEST COPY AVAILABLE

The MSDS attached is the best copy available from the manufacturer.

☐ MANUFACTURER NO LONGER IN BUSINESS

In response to your request for a Material Safety Data Sheet, a current MSDS could not be obtained for this product. It has been determined that the manufacturer listed below is no longer in business. A current address and phone number could not be located.

Manufacturer: Chesapeake Hardwood Products, Inc  
Product Name: CCA Pressure Treated Wood (DISCONTINUED)

**Chesapeake**

**WOOD TREATING CO.**

15th & Main Sts., Box 311, West Point, Va. 23181  
804/843-5653

**CONSTRUCTION TIPS**

In order to gain the most satisfaction from your new deck or project, we strongly suggest you follow these building tips:

- (1) Use galvanized or stainless fasteners. These products are corrosion-resistant and will prevent unsightly rust stains.
- (2) The natural beauty of CCA pressure treated wood products is one reason you chose to use our product. In time, the wood will weather to an attractive silver-gray color. If you decide to stain or paint your project, allow it to dry for about 60 days, then follow the manufacturer's directions.
- (3) Nail boards with bark side up to help reduce cupping. Drill pilot holes before nailing to prevent splitting.

**Use Chesapeake  
pressure-treated wood  
with confidence...  
our quality  
lasts for years.**

Compliments of:

**Chesapeake**

**Treated Wood  
Consumer  
Information  
Sheet**

**Chesapeake  
treated wood is...**  
best for decks,  
best for fences,  
best for benches,  
best for planter boxes,  
best for steps  
best for porches,  
best for picnic tables,  
best for marine use,  
best for barns,  
best for greenhouses,  
best for livestock pens,  
best for water troughs,  
best for playground,  
equipment,  
and much more

Chesapeake treated wood has been preserved by treatment with an EPA-registered pesticide CCA (Chromated Copper Arsenate) to protect it from insect attack and decay. Wood treated with CCA should be used only where such protection is important.

CCA penetrates deeply into and remains in the pressure-treated wood for a long time. Exposure to CCA may present certain hazards. Therefore, the following precautions should be taken both when handling the treated wood and in determining where to use the treated wood.

### **Use Site Precautions For Chesapeake CCA Pressure-Treated Wood**

- Exposed wood pressure-treated with CCA preservatives may be used inside residences as long as all sawdust and construction debris are cleaned up and disposed of after construction.
- Do not use treated wood under circumstances where the preservative may become a component of food or animal feed. Examples of such sites would be structures or containers for storing silage or food.
- Do not use treated wood for cutting boards or countertops.
- Only treated wood that is visibly clean and free of surface residue should be used for patios, decks and walkways.
- Do not use treated wood for construction of those portions of beehives which may come into contact with the honey.
- Treated wood should not be used where it may come into direct or indirect contact with public drinking water, except for uses involving incidental contact such as docks and bridges.

### **Handling Precautions For Chesapeake CCA Pressure-Treated Wood**

- Dispose of treated wood by ordinary trash collection or burial. Treated wood should not be burned in open fires or in stoves or fireplaces because toxic chemicals may be produced as part of the smoke and ashes. Large quantities of treated wood from commercial or industrial use (e.g., construction sites) may be burned in commercial or industrial incinerators in accordance with state and Federal regulations.
- Avoid frequent or prolonged inhalation of sawdust from treated wood. When sawing and machining treated wood, wear a dust mask. Whenever possible, these options should be performed outdoors to avoid indoor accumulations of airborne sawdust from treated wood.
- When power-sawing and machining, wear goggles to protect eyes from flying particles.
- Wash exposed areas thoroughly after skin contact and before eating, drinking or use of tobacco products.
- If preservatives or sawdust accumulate on clothes, launder before reuse. Wash work clothes separately from other household clothing.

Approved by the  
U.S. Environmental Protection  
Agency.
